- What contribution would the project make and where?
- Scope for extension into a major project.
- Conclusion.

The Problem Statement

Mental health problems affect around one in four people in any given year. They range from common problems, such as depression and anxiety, to rarer problems such as schizophrenia and bipolar disorder

Reason for selecting this Project

WHO also estimates that about 7.5 per cent Indians suffer from some mental disorder and predicts that by end of this year roughly 20 per cent of India will suffer from mental illnesses. According to the numbers, 56 million Indians suffer from depression and another 38 million Indians suffer from anxiety disorders.

Music is effective for relaxation and stress management. Research confirms these personal experiences with music.

So we decided to develop a website so that people get a getway from their busy life as well as kids to explore different musics.

Objective of the project

Upbeat music can make you feel more optimistic and positive about life. A slower tempo can quiet your mind and relax your muscles, making you feel soothed while releasing the stress of the day. Music is effective for relaxation and stress management.

It found that time spent playing the games was associated with players reporting that they felt happier.

Future Scope

As of now we are developoing a music streaming website but in future we may also develop an app to make it more interesting and amazing.

Perquisite

- HTML5
- CSS
- JavaScript

Methodology

In this project we create a music streaming platform written entirely in pure JavaScript and rendered by HTML5.

Hardware & Software to be used

Hardware -	As such no external hardware is required in this project, the only thing we need is a Laptop with decent specification which can run
Software -	

Scope for extension into a major project

If everything goes well we are planning to develop a music platform with huge collection of games.

Conclusion

This is a basic project which will help us increase our understanding in JavaScript and also will be our stepping stone in the field of web development, also help people in their pasttime.
